Faron Sooley

## Notice to Residents of Heart's Delight-Islington

### Re: Water Treatment Plant and Water Tower Update

The Boil Order Advisory that was issued on August 7<sup>th</sup>, 2022, has remained in place. We have been fortunate that the town water has been mostly clean and clear, but we still urge residents to boil any water that you might ingest to a rigorous boil for at least one minute. At this time Council cannot provide an estimated time that the water treatment plant will be fully operational. Council has been in contact with our engineer and he has provided a list of repairs that has to be completed at the water treatment plant. Due to the lengthy list of repairs and the cost involved, Council will be seeking Government assistance to help us with the cost.

When the boil order is lifted you will receive notification in your mail and on our social media page. Council realizes that the prolonged boil water advisory is very frustrating to everyone, however, we are working diligently to try and rectify the problem. We apologize for any inconvenience the advisory has caused and we thank you for your continued patience.

There is still a leak that cannot be found; Council is asking everyone to report water leaks to the Town Office.

Our water tower completion date has been an ongoing problem due to supply chain issues because of COVID-19. The new completion date for the water tower project is anticipated for September 2023.
